

## NEARSHORE SURVEY OPERATIONS AT SANDBRIDGE MAY 12 – MAY 28, 2021

The Kitty Hawk Offshore Wind project will conduct nearshore geophysical survey operations seaward of Sandbridge Beach, Virginia, from May 12 through May 28, 2021. Survey operations will be conducted by the R/V 4-POINTS during the period on a daily basis from dawn to dusk. Mariners are encouraged to note the noticed working area at the north end of Sandbridge for the survey vessel. The survey vessel will be towing survey equipment astern and requests 0.5 nautical mile clearance during survey operations. The vessel will monitor VHF 16 and 13.

Commercial fishermen are requested to not set fixed gear directly in the survey area during the brief survey period. Please contact Rick Robins, Fisheries Liaison, with any fisheries related questions.
